

## Introduction to Drones

Are you interested in the wide world of Unmanned Aerial Vehicles (UAVs), better known as Drones, but have no idea where to start? Then this is the class for you! Introduction to Drones will take you through the basics from FAA regulations to hands on readiness. You will leave this class with hands on experience through various flying exercises and course races. *\*Must be at least 16 years old.*

\$205

One-day class

March 11, 2017

Saturday from 9:00am to 4:00pm

at the Page County Technical Center

## Drones : Basic Applications for Construction, Transportation, and Agriculture

A practical introduction to unmanned aerial systems in construction, transportation, and agriculture. Explore unmanned aerial systems for commercial use in construction, agriculture, transportation and other sectors in the Shenandoah Valley economic region. Explore site inspection, survey, and photographic methods used in aerial systems. Learn the legal environment, path to certification, and conduct practical hands-on unmanned systems flying exercises. *\*Must be at least 16 years old.*

\$649

9 sessions total

March 14 - May 9, 2017

Tuesday from 4:00pm to 8:00pm

at the Page County Technical Center
