

ExxonMobil is committed to supporting math and science programs in our schools through Educational Alliance. Since its inception, ExxonMobil's Educational Alliance program has funded more than \$27 million in ongoing support for education in science, technology, engineering and math programs at schools in need.

Thanks to the efforts of Luray Caverns Exxon, Luray High School has been awarded a \$500.00 ExxonMobil Educational Alliance grant.

The money will be used to purchase materials and supplies for the Mathematics and Science Departments. The ExxonMobil Educational Alliance program is designed to provide Exxon/Mobil retailers like Luray Caverns Exxon with an opportunity to invest in the future of their communities through educational grants to neighborhood schools.
